

REVISED POLICY

[See POLICY ALERT Nos. 169, 171, and 183]

5331 MANAGEMENT OF LIFE-THREATENING ALLERGIES IN SCHOOLS

The Board of Education recognizes pupils may have allergies to certain foods and other substances and may be at risk for anaphylaxis. Anaphylaxis is a sudden, severe, serious, systemic allergic reaction that can involve various areas of the body (such as the skin, respiratory tract, gastrointestinal tract, and cardiovascular system). Anaphylaxis is a serious allergic reaction that may be rapid in onset and may cause death. Policy 5331 has been developed in accordance with the Guidelines for the Management of Life-Threatening Food Allergies in Schools developed by the New Jersey Department of Education.

An Individualized Healthcare Plan (IHP) and an Individualized Emergency Healthcare Plan (IEHP) will be developed for each pupil at risk for a life-threatening allergic reaction. Self-administration of medication, the placement and the accessibility of epinephrine, and the recruitment and training of designees who volunteer to administer epinephrine during school and at school-sponsored functions when the school nurse or designee is not available shall be in accordance with N.J.S.A. 18A:40-12 and Board Policy and Regulation 5330. School staff will be appropriately trained by the school nurse or designee to understand the school's general emergency procedures and steps to take should a life-threatening allergic reaction occur.

The school district will develop and implement appropriate strategies and prevention measures for the reduction of risk of exposure to food allergens throughout the school day, during before- and after-school programs, at all school-sponsored activities, in the cafeteria, or wherever food is present.

A description of the roles and responsibilities of parent(s) or legal guardian(s), staff, and pupils to prevent allergic reactions and during allergic reactions are outlined in Regulation 5331.

Every incident involving a life-threatening allergic reaction and/or whenever epinephrine is administered throughout the school day, during before- and after-school programs, and/or at all school-sponsored activities shall be reported to the school nurse or designee. The school nurse or designee shall be responsible to notify emergency responders, the Principal or designee, the school physician, and the Superintendent of Schools. The Superintendent shall inform the Board of Education after every incident including a life-threatening allergic reaction or whenever epinephrine is administered by the school nurse or designee. In addition, in accordance with the provisions of N.J.S.A. 18A:40-12.5.e.(3),
