

Name _____
 Practice Test 20 _____

Date _____
 Period _____

An investor had a total of \$100,000 to invest equally in five corporations. The investor therefore will invest \$20,000 in each corporation minus the stock broker transaction fee of \$10 for each stock. Please fill in the chart using the information provided and a calculator. The investor buys the stocks listed below on 11/14/2013. The investor waits a year and then sells all his stock on 11/14/2014.
